Subject: Forks Creek Hatchery

Connie, thank you very much for your timely comments and assistance in reviewing the Washington Department of Fish and Wildlife's (WDFW) proposed Hatchery Improvements at our Forks Creek Hatchery. While WDFW does not anticipate encountering contaminated media in fulfilling the elements of the proposed project, WDFW will be mindful and vigilant in overseeing and managing the project for your stated concern. WDFW appreciates the direction and legal requirements that you have provided if in the event of unanticipated discovery or even potential increased risk of contaminated media presence. I will ensure that your comments are pass along to the Forks Creek Hatchery Improvement Project Manager so that they are properly incorporated into our overall project management plan.

Again thank you for DOE's timely and helpful review and comments.
